

Proposal NHT

The National Housing Trust Amendment Proposal

We, the undersigned, propose that the Constitution be amended to secure for every citizen the right to a dwelling upon the soil of their birth. This amendment shall:

1. Guarantee to each adult citizen one dwelling and one commercial property, secured against speculation, foreclosure, or seizure. 2. Establish a National Housing Trust (NHT), funded by fair taxation and redirected subsidies, with administration delegated to the several States. 3. Forbid the buying and selling of existing dwellings as mere commodities, while preserving freedom in the private market for properties beyond the guaranteed minimum. 4. Restrict abusive speculation and monopoly, while preserving enterprise, innovation, and ambition above the baseline of security.

Thus do we affirm that no citizen shall be without shelter, that liberty may rest upon firm foundations, and that the blessings of property shall be secured for all.
